Your best bet would be to swirve right onto the right hand sidewalk, and wait fro the explosion to pass, the swirve over to the other side. Keep doing this until you are completely across the bridge. Then just follow Lance until you pass it. Backflip On A Motorcycle Without Falling Off. Usually when you try to do a backflip or when you just flip upside-down on a motor bike you fall off. To do A flip without falling off you will first have to go to the airport. You then will notice little stubs next to the runways with numbers on them and are either yellow or red. You will have to gain enough speed and just before you hit it. Slam your brake and then pull up. It should then flip you Very fast. You don't fall off! Also You can do 360 degree flips while going fast and turning at the same time. Note: It takes time to get this down It took me about 10 ties before I could get even a little good at it.
